November 30, 2004

Dear HTN Distributors,

Marine Bio in partnership with HTN is pleased to announce a new and improved processing method for our patented Alka-Line and Alka-Line Gold Sango Coral Calcium. This new process ensures maximum quality and consistency on every batch of HTN Sango Coral Calcium. The silver coating procedure/quality of the revised formulation of HTN's Alka-Line brand Coral Calcium Gold product will remain the same as the previous formulation.

Sincerely,

Hiroshi Someya
